### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Balazs on 12/9/2004.

2. The application has been amended as follows:

In claim 13, line 6, the phrase "held in a defined closed position" has been changed to -- substantially closed --.

In claim 13, line 7, the phrase "even without a vacuum, and" has been changed to -- and the blower is off, --.

### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance:

In claim 13, applicant has claimed a suction device for sample container closures comprised of the following elements: a suction passage (1), a blower (5), and a reservoir vacuum space (2). The reservoir (2) has a closure flap (4) on its underside. The closure flap is mounted with a counterweight (13) that is sized so that the flap is substantially closed when the reservoir is empty and the blower is off, the flap is fully

closed when the vacuum is on, and then the flap opens when the vacuum is off and there are closures in the reservoir. The Examiner considers "Beckwith" to be the closest prior art. Beckwith teaches a closure flap that is in a closed or substantially closed position ***only when the vacuum mechanism is on.***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
